

North Bay .NET User Group Building Business Applications with Silverlight 3

Thursday, 10/22/2009, meeting at 7:00 PM

O'Reilly Media in Sebastopol

1003-1005 Gravenstein Highway North, Sebastopol
Tarsier Conference Room (between Building B and Building C)
(8 miles west of Santa Rosa)

Silverlight 3 has launched. In this session, we will illustrate how you can build powerful line of business (LOB) applications with Silverlight 3 and Expression Blend 3. We will begin with illustrating how you can build powerful prototypes with SketchFlow in Blend 3. We will then implement a LOB application, illustrating some design patterns such as the Repository and Model View ViewModel (MVVM) along the way.

Speaker Biography

Bruno is used to sleeping with his passport. As a former Microsoft Premier Field Engineer, he has traveled to distant locations to help customers with problem isolation and correction, live and post-mortem debugging, application design and code reviews, performance tuning (IIS, SQL Server, .NET), application stability, troubleshooting, porting / migration assistance, configuration management, pre-rollout testing and general development consulting. Starting with Turbo C in the late 80's, Bruno has kept busy teaching and writing code in a multitude of platforms, languages, frameworks, SDKs, libraries, and APIs. He claims that he'd read and write code even if he won the lottery. He is excited about rich applications powering the web, and the technologies that are evolving, morphing and merging currently Virtualization, SOA, Web 2.0 and SaaS applications, using Visual Studio as the glue to manage these diverse computer worlds. Bruno started his computing pursuits while getting his accounting and finance degree from UC Berkeley's School of Business.

Bruno now works as a developer evangelist, focusing on new and emerging technologies. You can read more about him at www.brunoterkaly.com.
