Available: Now

The Collaborative Project Management (CPM) User Experience team seeks an intern for their usability lab.

Responsibilities:

- Prepare for studies (setup equipment, schedule customers, send/track invitations, etc.)
- Assist with facilitating studies
- Help designers develop prototypes for studies
- Help with research projects and surveys
- Create reports on usability data/findings
- Maintain group Wiki with reports

Skills/abilities

- Great attention to details
- Analytical abilities
- High energy and motivation
- Excellent oral/written communication skills
- Basic knowledge of MS Office products
- Some familiarity with HTML/Photoshop, or other graphical applications
- Some knowledge of design principles (or at least interest in software design and usability field)
- Ability to handle multiple projects and be adaptive to a changing environment

Requirements:

- Enrolled in a college/university program in HCI/Human Factors or Computer Science/Software design or related fields and areas of studies.
