

Internship Opportunity with the City of Santa Rosa
Posted 05/21/09

Currently City of Santa Rosa official meetings (City Council, Board of Public Utilities, Planning Commission, etc) generate hundreds of pages per week in agenda overview, staff presentations and attachments. While published on the website (www.srcity.org), the City is also interested in researching alternative delivery of this content, specifically utilizing the Amazon.com electronic publishing standards and processes. We view the Amazon.com Kindle2 and the larger-format KindleDX as an interesting client-side solution and wish to investigate further.

Intern Objectives:

- 1) Research, develop and implement a Kindle-based electronic publishing process for City of Santa Rosa official meeting content.
 - a. Board of Public Utilities
 - b. City Council
 - c. Planning Commission
 - d. Others, tbd
- 2) Test content creation and delivery on a Kindle2 using the blog, hyper-linked magazine and/or book formats.
- 3) Review results

The position will report into the Information Technology group and is expected to require 2-3 months of full time-equivalent work.

Minimum qualifications:

- Experience with HTML programming
- Familiar with Microsoft Word and the general Microsoft desktop environment

Compensation: \$15 - \$18 per hour, depending on qualifications.

Please send a resume and cover letter demonstrating qualifications to Jami Ross at jross@srcity.org.

Open until filled. Apply ASAP.
