

Software Engineer-Contract Position

Emphasis in Python!

Perfect career opportunity for your summer break!

An environmental, air quality consulting company located in Petaluma is seeking a software professional to support software development for a particular major project to last approximately 3 months. *This could lead to a direct hire opportunity!

Key development skills desired are:

- Specific and solid experience with Python
- Linux experience

Additional preferred skills include:

- C development
- Java
- Familiarity with XML and web services
- GIS knowledge or experience with ArcGIS tools

A good understanding and rock-solid experience with Python is necessary for this exciting project. A foundation in software development, with recent Python experience is necessary. A good work ethic, effective verbal and written communication skills and the ability to meet constant deadlines are all necessary. This casual work environment supports collaboration, intellectual stimulation and an opportunity to learn something new every day.
