

Project Software Developer

myLinkx is an innovative Santa Rosa, CA based software start-up focused solely on mobile collaborative software solutions for small to medium size businesses. Real time input provides for efficient management of time and resources. Software has a strong emphasis on productivity and information sharing across the business organization. The software can be easily adapted to any business model and system platform.

We are looking for a motivated self-starter. This is a rare opportunity to join an innovative start-up, help shape the future of our company and open the possibilities for unlimited growth in your career. As a project software developer you will have to be comfortable and capable of communicating your ideas and solutions to the rest of the team. You will also be working on your ideas in a team environment and you will be able to see your idea go from its concept stage to the marketing stage.

Responsibilities:

- * Work on projects to improve and add functionality to the current solution
- * Design, build and own software projects
- * Automate testing of software
- * Manage the production environment

Requirements:

- * Knowledge of a scripting language like Javascript, PHP, Ruby etc.
- * Knowledge of databases and their concepts.
- * Comfortable with a Linux based development environment including basic shell scripting
- * Ability to pick up new languages and technology quickly
- * Knowledge of web applications and their stack
- * Strong technical aptitude with a passion and commitment for customer success
- * Motivated self-starter and over-achiever willing to go the extra mile.
- * Excellent written and verbal communication skills
- * Bachelor's Degree from an accredited four year University

Preferred:

- * Experience with Ruby, ROR and MySQL
- * Experience designing User Interfaces
- * Experience with mobile software development
- * Experience with cloud computing environments
- * Experience with core languages like C/C++/Java
- * Some experience with windows application development
